

2016/2017 RANGE

## 100% NEW ZEALAND OWNED AND OPERATED

Established in 1946, Clearlite is a trusted supplier of quality bathroomware designed with New Zealand homes in mind. With over 40 years experience in the bathroom industry, our aim at Clearlite is to provide a selection of Showers, Vanities, Mirrors, Bathroom Furniture, Baths and Spas to suit the style needs and budgets of all New Zealanders.

We are a 100% New Zealand owned and operated company who believe in manufacturing quality products using trusted raw materials. This helps to ensure our products not only look good but stand the test of time. The majority of our product range is designed and manufactured here in New Zealand. We do import a selection of products some of which we design ourselves to complement our core range. All products are subject to our own quality control check before dispatch.

## CLEARLITE.CO.NZ

We recommend you visit the Clearlite website to help with the planning of your new home or bathroom renovation project. Our website is packed with helpful information from printable technical drawings and installation instructions to product images which are all on hand to assist with your bathroom product selection. You are also able to view our full list of independent Shower Installers in your area who can correctly install your shower.

## WHERE TO ORDER

For product queries and ordering, please visit your local plumbing or building merchant. See [www.clearlite.co.nz/retailers/](http://www.clearlite.co.nz/retailers/) for merchant details.

## RECOMMENDED RETAIL PRICES

You can find recommended retail prices for all Clearlite products on our website. It's as easy as point and click to download a copy of the latest prices.

# SHOWERS

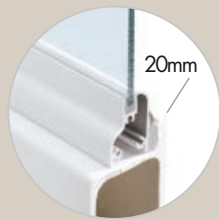

Clearlite showers are available in a selection of styles, sizes and configurations to suit any New Zealand bathroom. Our showers are constructed from the highest quality materials and are designed to enhance product longevity. All Clearlite shower enclosures come complete with tray, wall lining, door set, easy clean waste and installation pack.

Clearlite acrylic shower trays, wall liners and door sets\* are proudly manufactured in New Zealand. \*excluding our imported Cezanne sliding door set

## SAFETY GLASS

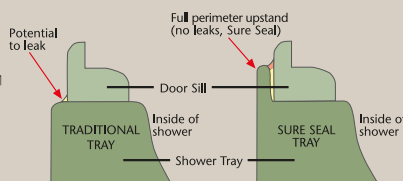

Bathroom projects may need to obtain a code of compliance. All Clearlite Showers are manufactured with this in mind and use toughened safety glass complying to AS/NZS2208.

## SURE SEAL™ TRAY

The unique design of the Sure Seal™ Tray offers a full 20mm upstand around the perimeter of the shower. Both door and liner are installed within the tray so water flows back into tray whilst in use.

(Sierra 760mmx760mm tray is not Sure Seal)

**LUCITE®**  
The source of inspiration

## ANTIBACTERIAL LINING

Senosan® premium quality sheets featuring Antibac are used in the manufacturing of Clearlite shower wall linings. The gloss material protects your family from bacteria with its easy-to-clean surface.

**senosan®**

## EASY CLEAN WASTE

All Clearlite showers include a chrome easy clean waste.

## CLEANING & MAINTENANCE

- Wipe down the shower or use a squeegee to remove excess water from the glass after use
- Use a trusted glass cleaner on shower glass and bath screens to remove soap deposits.
- Clean the shower tray and liner surfaces using the Vibrance Surface Cleaner or another cleaner that specifically states that it is suitable for use on acrylic surfaces
- Waste lid and cup should be removed and cleaned regularly
- Remove and clean drip seals on a regular basis

## THE ULTIMATE FOR RENOVATIONS!

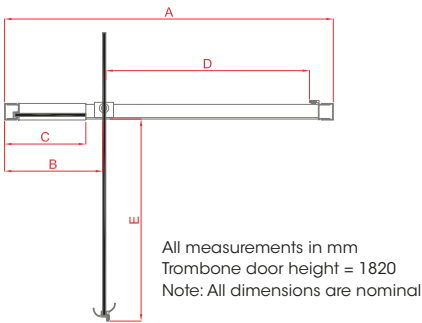

The Trombone is a fully adjustable door that can be easily customised to fit the size of the door opening required. Trombone doors are a great way to update your bathroom in a rental, bach or home. There are five door sizes to choose from between 640mm to 1000mm. The Trombone features a full length aluminium handle with integrated magnetic closure. Trombone doors are available in White.

## HOW TO USE THE TROMBONE TAPE MEASURE

By using our tape measure you can easily select the right Trombone door for you. The Trombone tape is available at the Clearlite showroom or your local building/plumbing merchant

1. Extend the Trombone door tape measure across the area where the door will fit
2. Make sure the left end of the tape is flush against the left side of the door opening
3. Note which Colour-Zone on the right of the tape crosses the right side of the door opening
4. Repeat the process at the top and bottom of the door opening to check the Colour-Zone is the same in both areas
5. Go to your nearest Clearlite stockist and purchase the door that matches the Colour-Zone

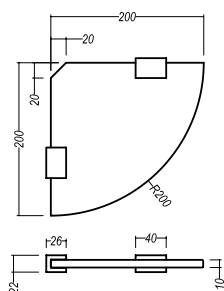

Size	Code	A (Minimum / Maximum)	B (Minimum / Maximum)	C	D	E
640 Red	100600640	640 / 700	188 / 248	140	399	396

## GLASS SHELF

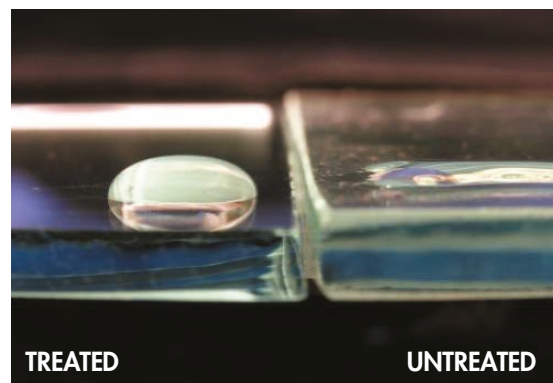

- Subtle storage solution
- 10mm toughened safety glass with slim chrome plated brackets
- Suitable for use with acrylic or tiled wall
- Can be retro fitted to existing walls

SHELF 7345040200

## DIAMOND FUSION<sup>TM</sup> easyCLEAN

## LIFETIME WARRANTY

Diamond Fusion easyCLEAN offers an instant 1 year warranty. By a simple on-line registration customers can extend this to a LIFETIME WARRANTY, which is backed by a NZ wide agent network.

## WHAT IS DIAMOND FUSION?

Put simply, Diamond Fusion is a permanent treatment designed to seal and protect glass. Treated surfaces become water repellent as well as scratch, stain and impact resistant. Diamond Fusion easyCLEAN uses the world's leading Nano Technology products from "Diamond-Fusion International". Nanoscale technologies are the development and use of devices that have a size of only a few nanometres.

## HOW DOES IT WORK?

Glass is not as smooth as you might think – it is actually quite a porous surface which makes an ideal setting for soap residue, dirt and mineral build ups to reside which, over time can result in a cloudy or noticeably dull appearance. Diamond Fusion Easy Clean works in two stages to protect your glass from these impurities. The first stage "Fills in" the rough, porous surface of the glass and the second stage "Caps" the previous layer with an optically clear material which makes the surface significantly easier to clean and resistant to weathering.

## SAVE TIME NOW AND LATER

NOW - By opting for this optional treatment to be applied to your shower glass before it leaves the factory, there's no need to worry about arranging the application once your shower has been installed.

LATER - While you still need to maintain your glass, Diamond Fusion easyCLEAN takes the difficulty out of it. Your Saturday mornings will no longer be spent scrubbing your shower glass for hours.

XDFA DIAMOND FUSION SIZE A FOR 3 SIDED CLEARLITE SHOWERS  
XDFB DIAMOND FUSION SIZE B FOR 2 SIDED CLEARLITE SHOWERS AND SHOWER OVER BATHS

The Diamond Fusion easyCLEAN treatment is available on Sierra and Millennium showers as well as bath swing panels and door sets. Cezanne showers cannot be factory treated. Contact Diamond Fusion for post install price.

# BATHS & SPA BATHS

See page 17 for Spa Bath Info

\* Water capacities are the minimum operating water capacities for Standard Spas, 80mm from the top of the Raphael bath or to the overflow on Porcelain on Steel baths.

## BATH/SPA CLEANING AND MAINTENANCE

To keep your Bath or Spa Bath in top condition we recommend you clean it regularly with a soft cloth using a non-abrasive cleaner such as Vibrance Surface Cleaner. Make sure cleaners you use are recommended for use on acrylic surfaces so you don't cause damage to the surface. The Spa system should also be flushed on a regular basis. We recommend you use Vibrance Spa Flush every 3 months.

# SPA BATHS

Clearlite offers an array of sizes and styles of spa baths to transform any bathroom into a relaxing sanctuary.

## TYPES OF JETS

### STANDARD JETS

Standard Jets provide a concentrated flow of water and air through adjustable eyeball outlets that allow fingertip control of the directional flow and intensity of the water. Each jet can be independently adjusted to suit personal preferences. The pressure released by a Standard Jet delivers a deep massage that can relieve muscle tension and ease pain in targeted area.

### MINI JETS

Mini Jets are a quarter the size of a Standard Jet and are designed to deliver a flow of water and air through concentrated outlets. Positioned in clusters to focus on the lumbar region, the jet faceplate can be adjusted to vary water flow through the jet, delivering customised water intensity. This feature allows some or all of the Mini Jets to be turned up or down to suit individual needs.

### WHISPER JETS

Whisper Jets send air through the fixed jets, dispersing thousands of tiny air bubbles that produce a champagne effect in the water. On contact with the skin these bubbles create a relaxing and invigorating 'tingle' that helps sooth and relax the body. The pressure released creates a light soothing massage which is more gentle than a Standard Jet. *Whisper Jets are exclusive to Clearlite Bathrooms.*

## SPA OPTIONS

Combining different types of jets will optimise the function of the spa bath. We recommend selecting Mini Jets for a focused lumbar massage.

### STANDARD SPA

If a vigorous massage that targets specific areas to relieve body pain and sooth tender muscles is needed, then a **STANDARD SPA** would be the perfect choice.

### WHISPER

For general relaxation and to relieve stress, the **WHISPER SPA** is the ideal choice because it delivers a gentle tingling experience without a direct focus of pressure.

### WHISPER + MINI

The combination of **WHISPER + MINI JETS** provides the ultimate in relaxation, targeting the back area with the Mini Jets while delivering the soothing tingle created by Whisper Jets.

### HYDRO

A **HYDRO** Spa uses both Standard and Mini Jets for a high pressure water massage in all the key places. Standard Jets target the sides of the body and legs and the sets of Mini Jets deliver an invigorating focus on the back.

All Clearlite spa baths are made by a New Zealand team of specialists and are supplied with factory fitted plumbing, wooden support frame and heated pump.

### CONTROL PANEL

Clearlite spas feature a low voltage electronic touch pad to control the pump and heater. Unlike some other systems the Eco Heat button enables the heater to be turned off/on while the pump continues to operate.

### AIR BLEED

Clearlite Spa baths feature an air bleed function to introduce air into the water stream. When the air bleed is open, the jet is drawing maximum air creating a vigorous massage. When closed, only water comes through for a gentle soft massage.

### SAFETY SUCTION

The vortex suction system provides safety with a built-in bypass which neutralises the suction in the event of blockage.

**As our spa baths are made to order, it is important that you determine the positioning of the pump and control panel and ensure that you have access to these for general maintenance or servicing.**

# CABINET FINISHES & VANITY TOPS

Clearlite cabinet finishes are extremely high quality. Compared to wood veneer, and paint, they will resist bumps and knocks more readily and are more likely to maintain their as new finish over time as paints and lacquers tend to dull with ongoing exposure to UV.

**WHITE GLOSS** - A White Gloss cabinet delivers a timeless style. Gloss vinyl (PVC) is vacuum-formed and pressed over the cabinets surface to create a seamless vanity that is long lasting with a chip resistant surface.

**WHITE MELAMINE** - Clearlite white melamine cabinets with PVC capped edges offer affordable quality.

**COLOUR FINISHES** - A coloured cabinet is the perfect way to bring personality and depth to the bathroom. The coloured layer is heat bonded in to the surface of NZ board and is finished with PVC capped edges. The result is a hard wearing durable cabinet that when looked after, will look like new for years to come.

NOTE: Colour reproduction is as near to actual colour as printing methods allow.

## VANITY TOPS

**VITREOUS CHINA** (or VC) has a classic appearance with its solid glassy finish. VC products offer excellent heat, scratch, stain and wear resistance. Made from a natural material it is a cast ceramic (clay) glazed with enamel (glass). Due to the nature of its production, visible imperfections are part of the overall look of VC meaning no two tops are produced the same.

**COMPOSITE** tops and basins have a gloss surface that achieves a clean smooth look almost free from surface imperfections. Tops are resistant to impact damage and offer good dimensional stability. Composite tops are created using a mixture of resin and mineral fillers with a hardwearing gel coat top surface.

**ACRYLIC** vanity tops offer a glossy smooth finish with straight edges. A hardwearing product that is manufactured using thermoformed Lucite® acrylic reinforced with polyester resin.

## DESIGN PARTNERS

Clearlite would like to acknowledge the support of the following businesses who helped with the creation of many bathroom sets within this catalogue.

METHVEN

## FUTURE PROOF BUILDING

Future Proof Building is a national initiative involving leading brands and service providers in the building industry. Simply put, it means choosing features and solutions for your home that best suit to improve the quality of life for your family. This can contribute towards minimising your home maintenance and improving your home's future value. For Clearlite, it's about supplying you with quality products, reducing product life cycle costing, ensuring health and safety features, creating options for space management and being aware of our environmental/resource responsibilities. [fpb.co.nz](http://fpb.co.nz)

# VANITY CABINET MATERIALS

## MATERIAL AND CONSTRUCTION

The foundation of great design is top class materials and construction. At Clearlite Bathrooms we are proud to know that our customers enjoy world class materials in the construction of all cabinets, which are manufactured right here in New Zealand. If you visit the leading interior fashion fairs in Milan or Cologne, you will see New Zealand can manufacture to a standard that is the equal of anywhere in the world, if not better. The key materials in our vanity cabinets utilise the best in worldwide proven market-leading technology.

## BOARD + BOND = THE MOISTURE RESISTANT TEAM

Bathrooms by their nature are exposed to moisture from splashes and steam. For all melamine and colour finishes we use New Zealand supplied Moisture Resistant Board. It is the combination of this Moisture Resistant board with PUR bonding technology that delivers the most moisture, and heat resistant cabinet possible. PUR bonding technology was originally developed in Europe to withstand the harsh shipping conditions to the fast-growing, demanding luxury markets of the Middle East. PUR bonding is acknowledged worldwide as delivering the most heat resistant, moisture resistant, and near-seamless bond possible. Technically it chemically sets against the moisture carried via air and therefore it literally resists moisture. For this reason it is the perfect pairing with the Moisture Resistant board.

## NEW ZEALAND GROWN - NEW ZEALAND MANUFACTURED - ENVIRONMENTALLY SUSTAINABLE BOARD.

New Zealand's board is highly regarded around the world for its environmental sustainability and low emission characteristics. Sourced only from New Zealand's sustainable FSC certified Radiata Pine Plantations, New Zealand board producers pioneered the drive to low-formaldehyde emissions. This quality standard is required in key export markets of Japan and USA and is delivered to our customers. This low emission board is infused with a treatment that provides the extra resistance to splashes and steam when compared to standard board.

## CLEANING AND MAINTENANCE

Extending the life and appearance of your Clearlite vanity is easy. Simply wipe down all water from the vanity surface and clean regularly using Vibrance Surface Cleaner. The Vibrance Surface Cleaner is suitable on acrylic, vitreous china, melamine and coloured finishes.

## WARRANTIES

At Clearlite Bathrooms we stand behind our products and offer warranties on all our bathroomware so that you have peace of mind that what you have purchased for your home is of the highest quality and fits the purpose it was intended for. All Clearlite products come with installation instructions which are also available on our website. We recommend you use a professional tradesman to install your product such as a trained shower installer. This ensures that warranty requirements are met during installation and to future proof your bathroom.

WARRANTIES*	COVERAGE
Showers, Baths, Vanities, Furniture	5 Years
Drip Strips & Vertical Seals	1 Year
Mirrors	2 Years
Spa (electronics, pump and fittings)	2 Years

**NOTE: Warranty is void if products are not installed according to our specifications.**  
**Please visit our website for installation instructions.**

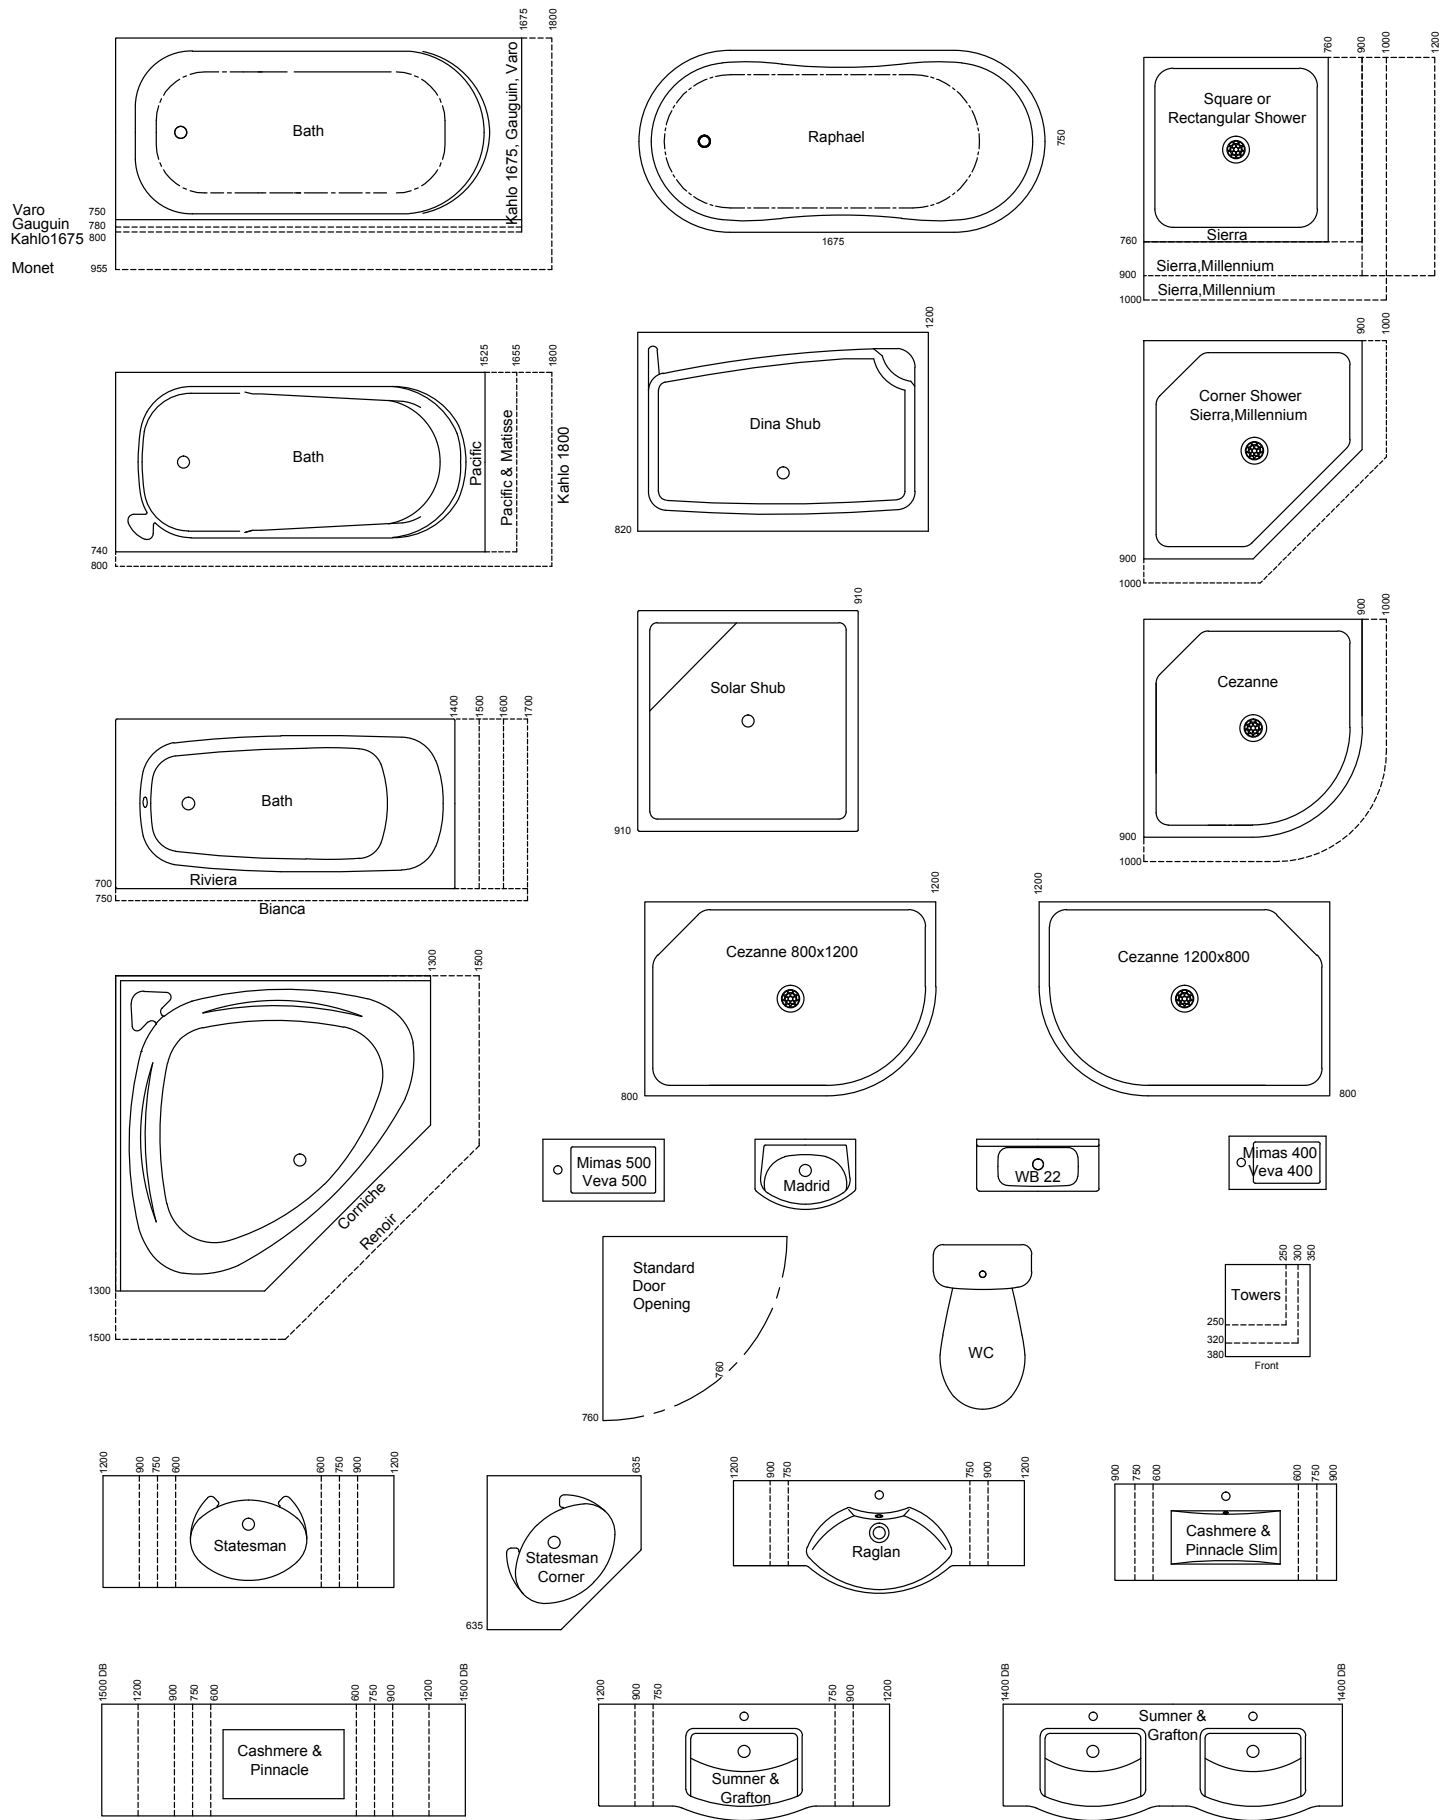

Note: Some cleaners are not suitable for acrylic surfaces and if used may cause premature failure of the product that will not be covered under warranty. \*Special care should be taken when selecting a cleaner.\* Clearlite retains the right to change products and specifications without notice. Handle styles in particular can vary as new designs become available. This brochure does not constitute an offer by Clearlite and is not intended as an exhaustive description of product performance for suitability. All measurements are nominal. This brochure supercedes all previous brochures. This edition is dated March 2016. Tapware and accessories shown in this brochure are for photography purposes only.

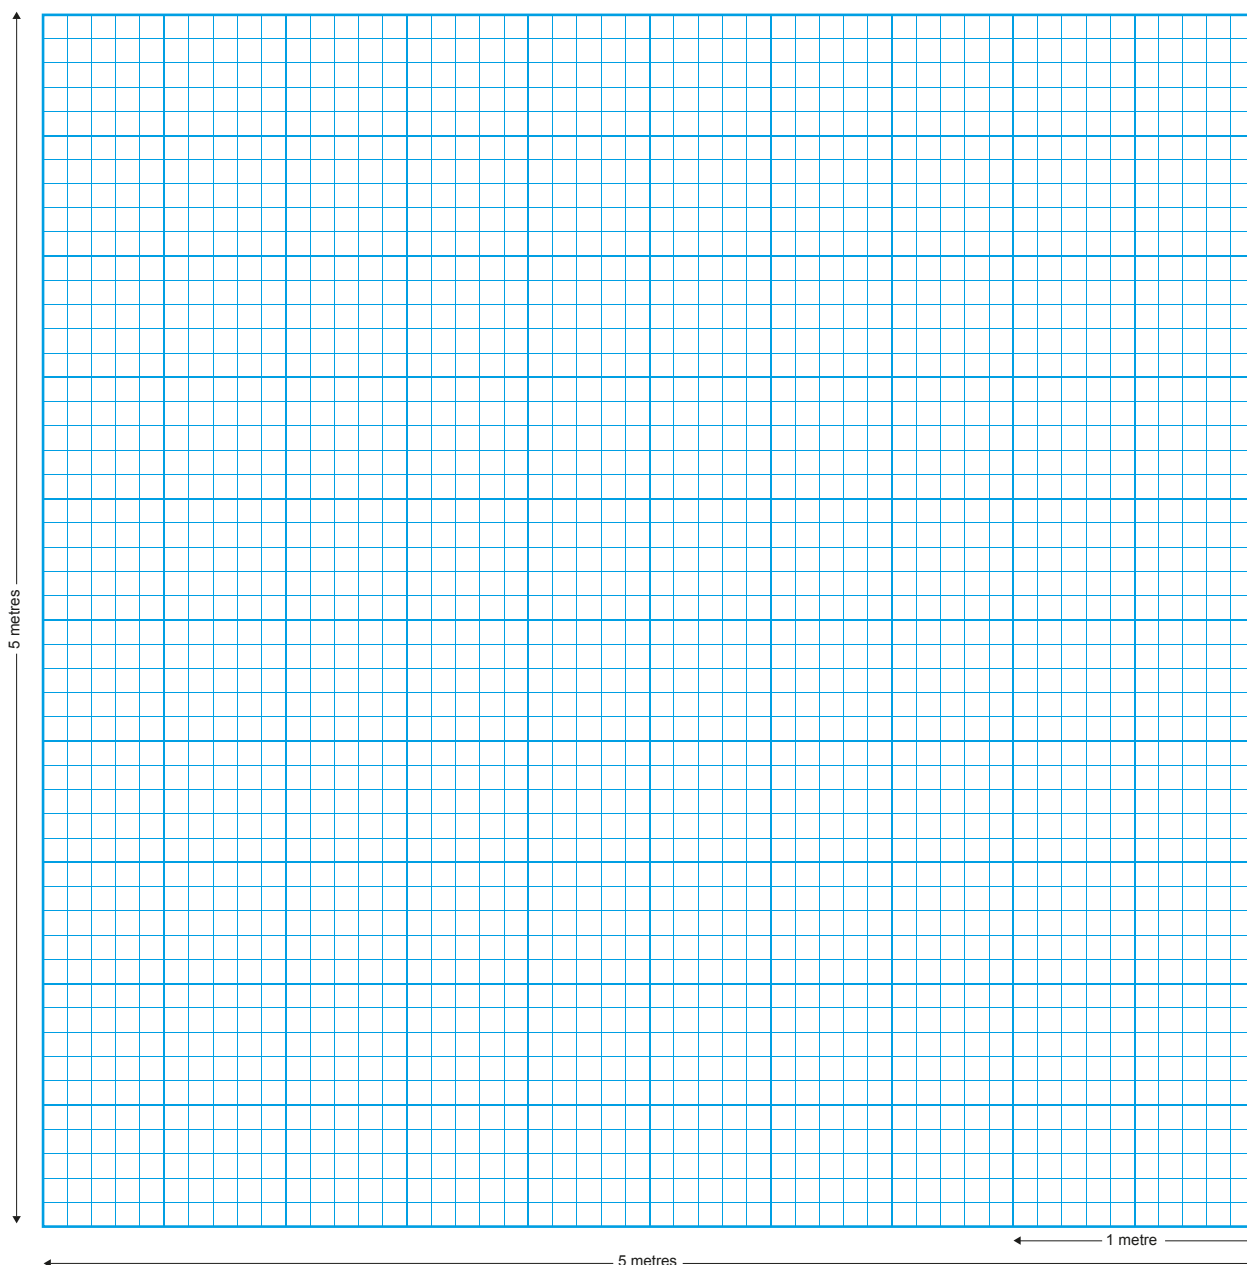

# BATHROOM PLANNER

The Clearlite Bathroom Planner that follows is a great tool to help you layout and visualise your bathroom using Clearlite products.

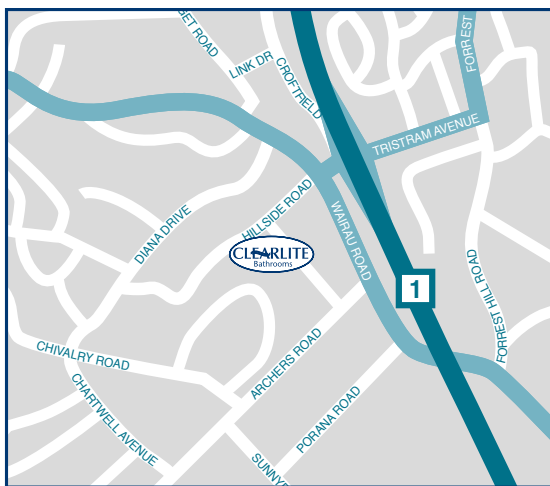

Your Bathroom Planner should only be considered as a guide, always ensure you confirm details with your trade professional.

- 1 Start by measuring the size of your bathroom space. Draw these measurements on the bathroom grid, making sure you use the scale to get the correct size and shape. One square equals 100mm.
- 2 Mark in any window and door positions and note the way they open. It's also useful to measure the height to the window sills, which can help with your decision on product placement.
- 3 If you wish to keep any existing plumbing fittings (shower mixer, taps, inlet pipes, water pipes, and toilet waste pipes) or electrical fittings (electrical points, switches and heaters), make sure you mark these onto your grid.
- 4 Select which Clearlite products you would like in your new bathroom.
- 5 Once you have chosen your Clearlite products, cut out each diagram from the Bathroom planner. Make sure you cut out the correct lines for the length and width of your product. You might want to double check measurements in the Clearlite Catalogue prior to cutting.
- 6 Place all product diagrams on the Bathroom Planner and move them around until you find the combination that works best for you. Important factors to think about are:
  - Allowing enough room for doors and windows to open.
  - Products such as a toilet/bidet are best positioned away from the bathroom door opening.
  - It's better to place a product of interest in the direct line of vision upon entry.
  - Make sure the location of products are in the best area to be used.What would work best in your daily routine? Can family members or children use the product with ease?
