

# BATHROOM PLANNER

The Clearlite Bathroom Planner that follows is a great tool to help you layout and visualise your bathroom using Clearlite products.

Your Bathroom Planner should only be considered as a guide, always ensure you confirm details with your trade professional.

- 1 Start by measuring the size of your bathroom space. Draw these measurements on the bathroom grid, making sure you use the scale to get the correct size and shape. One square equals 100mm.
- 2 Mark in any window and door positions and note the way they open. It's also useful to measure the height to the window sills, which can help with your decision on product placement.
- 3 If you wish to keep any existing plumbing fittings (shower mixer, taps, inlet pipes, water pipes, and toilet waste pipes) or electrical fittings (electrical points, switches and heaters), make sure you mark these onto your grid.
- 4 Select which Clearlite products you would like in your new bathroom.
- 5 Once you have chosen your Clearlite products, cut out each diagram from the Bathroom planner. Make sure you cut out the correct lines for the length and width of your product. You might want to double check measurements in the Clearlite Catalogue prior to cutting.
- 6 Place all product diagrams on the Bathroom Planner and move them around until you find the combination that works best for you. Important factors to think about are:
  - Allowing enough room for doors and windows to open.
  - Products such as a toilet/bidet are best positioned away from the bathroom door opening.
  - It's better to place a product of interest in the direct line of vision upon entry.
  - Make sure the location of products are in the best area to be used.What would work best in your daily routine? Can family members or children use the product with ease?

# WHERE TO VIEW

## CLEARLITE SHOWROOM

### CLEARLITE BATHROOMS AUCKLAND

54-58 Hillside Rd,  
Glenfield, Auckland 0627  
Private Bag 40902, Glenfield, Auckland 0747
